DETAILED ACTION

Restriction requirement mailed on 4/14/05 is withdrawn in view of the following new restriction requirement.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 drawn to dispensing, classified in class 222, subclass 321.9.
- II. Claim 9, drawn to Molding Process, classified in class 264, subclass 452.
- III. Claims 10-16, drawn to Molding Apparatus, classified in class 425, subclass 190.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Groups II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make a different product such as a container without a pump.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3754

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
